

# Utku Arslan

Data Scientist & Researcher

## Contact

utku.arslan@hotmail.com

+90 541 947 2705

Beşiktaş / İstanbul

## Education

### 2-year Program

Stanford Online

Theoretical Physics

### Bachelor's Degree

Maastricht University

Data Science & Artificial Intelligence

### Certificates

Financial Markets - Yale

Probabilistic Deep Learning - Imperial

Blockchain and Web3 - INSEAD

## Proficiencies

ML & AI

Data Science

Statistics

Finance

Complex Systems

## Languages

English (Bilingual)

Türkçe (Native)

German (Intermediate)

Dutch (Intermediate)

Spanish (Beginner)

## Profile

Autonomous, disciplined, and knowledgeable data scientist with expertise in AI, machine learning, and physics with 4+ years in Fortune 100, United Nations and start-ups. I have 5 research papers and actively participate in scientific research in Kaggle competitions. I built many end-to-end products, developing architectures, deploying models and serving web applications. I excel at R&D with defined purpose and boundaries.

## Work Experience

### Data Scientist

Eurosis Consulting – İstanbul

September 2024 – Present

- Developed internal AI tools using RAG, Knowledge Graphs and Agentic workflows
- Built computer vision algorithms for clients using segmentation and classification
- Analysed client survey results, produced and presented the findings

### AI Developer

Poiesy - Maastricht

September 2023 – April 2024

- Worked with a team of biomedical scientist on Bone Marrow Cancer drugs.
- Developed prototypes which showed an increase in drug effectiveness from 40% to 86%.
- Attended stakeholder meetings and adapted to the emerging needs.

### ML Developer

Johnson & Johnson - Leiden

August 2022 – August 2023

- Worked on both ML-based and biology-based cellular growth models.
- Developed model that could predict 90 day cellular growth with 90% accuracy.
- Created new ML framework which combines Deep Learning with Biology-based models, offering explainability and grounding.
